

Preparatory Phase for the Einstein Telescope Gravitational Wave Observatory

Educational videos about the fundamental of project management scheduling

Author: Christian Olivetto (IJCLab)

This project has received funding from the European Commission Framework Programme Horizon Europe Coordination and Support action under grant agreement 101079696.

Content

Topic: Educational videos about the fundamental of project management scheduling

Target audience: ET collaborators but also open to everyone

Context of use: Could be studied remotely at our own pace since the training is available on YouTube.

Objective: The videos were produced as part of the deployment of the planning methodology for ET, it is aimed for the collaboration members but also for the general public. The videos show the benefits of the methodology for consolidating planning but also for budget, asset management (critical material), internal communication (wiki, news), risk assessment with associated matrix and finally give the associated indicators.

Description: The tutorial is a set of 11 videos of with an average of 3 minutes

Materials: It could be found online: https://www.youtube.com/@ETTelescopeSchedule
